

*Today at Oracle Audio Technologies, the first units of the new Oracle SI-1000 Integrated Amplifiers are being shipped to distributors around the world.*

Sherbrooke, PQ — October 31, 2006 — Today at Oracle Audio Technologies, the first units of the new Oracle SI-1000 Integrated Amplifiers are being shipped to distributors around the world. Oracle Audio Technologies announced immediate availability of the SI-1000 Integrated Amplifier, enabling distributors to immediately supply their dealer base.

"This new product, the SI-1000 has been in huge demand from our worldwide distributors," says Oracle Audio. "It has been in development for 18 months and we expect to meet our distributors' demands." With the release of the SI-1000, we expect more distributors to broaden their Oracle offering to customers."

The Oracle SI-1000 is a slightly scaled down version of the popular SI-3000 Integrated Amplifier. Most of the features have been included in the SI-1000, in a re-designed chassis. The Oracle SI-1000 is a 175 watt per channel, remote control stereo integrated amplifier built of the highest quality component standards. This new integrated amplifier fills the need for a high-value, cost effective integrated amplifier for the customer looking for a simple, high-quality stereo system.
