

# ORACLE AUDIO

Stereo Times

The Oracle Audio room must be mentioned. This room was very inviting with good sound and the design alone was a work of art for the eyes and the ears. The futuristic Oracle CD 2500 player (\$9,380) was beautifully built and produced a sound to match its superb design. The SI 1000 Integrated amplifier (\$9,250) at 175 Watts with preamplifier stage is pure Class-A driving the beautifully finished Usher Audio Dancer 8571 loudspeakers (\$8,500). All cabling was by Analysis Plus.
